## E-News 20 March 2020

Good Afternoon Subscribers Name

As we have had to postpone our assemblies, our student leaders thought to still inform our community about the awesome learning happening in our classrooms over the past couple of weeks.

Below are the results of their investigations and photography skills.

### Room 7

Room 7 have been researching information about an Asian country of their choice, on Fridays with Mrs Upchurch. They have been making different types of graphs from the information they collect throughout the classroom. They have also recently entered into the Bebras 365 Challenge which included a number of multi levelled challenges and puzzles, online. And they have been creating their own digital story (using Power Point) on the information of an animal with a weird/ interesting adaptations. While they have been researching that, they have also been looking into the features of animals and how they are sorted into animal groups depending on their adaptations. They look like they have been having a blast and sounds like it has been fun!

### C2

C2 have been watching a monarch butterfly hatch and seeing the life cycle of it. They also made a collage of a butterfly. They have learned about sounds in literacy.

## ROOM 2

They have been weighing objects and writing wishing stories based on owl babies. They had a spelling test. Their tadpole from last year turned into a frog.

## Rm6

Room 6 have been painting astronauts and have been working with hydraulics, levers, pullies and cherry pickers with Mr Bernhardt. In science they have been learning about gravity and seeing how much it takes to lift 500g. They have also been learning about heat.

## Rm8

Room 8 have been walking to the fore shore to see how it has changed over the years. In the next few weeks they are going to do some cockle sampling.

In class they made a fish mobile and describing their fish.

In science they have been making their own experiments, seeing if ants run faster when it is cold or when it is hot. They have also been seeing if bigger or smaller paper planes go further.

This term **Room 3** have been learning about the four seasons that are in the year. They have also been making symmetrical butterfly landscapes.

Room 3 has also learned different types of lines, such as spiral, horizontal and blank lines. They have made hands with their goals for the year on them. In H.A.S.S they made maps of the world as well as labelling the 7 continents.

Have a great weekend.
